

FLORIDA DEPARTMENT OF Environmental Protection

Marjory Stoneman Douglas Building 3900 Commonwealth Boulevard Tallahassee, FL 32399 Ron DeSantis Governor

Jeanette Nuñez Lt. Governor

Shawn Hamilton Secretary

May 8, 2023

The Honorable Ron DeSantis Governor of Florida Plaza Level 01, The Capitol 400 South Monroe Street Tallahassee, Florida 32399

Miami-Dade County Legislative Delegation Chair: Senator Ana Maria Rodriguez 3800 NW 115th Avenue, Suite 1112 Doral, FL 33178

Mayor Daniella Levine Cava 111 N.W. 1st Street, 29th Floor Miami, Florida 33128

Mayor Francis X. Suarez 3500 Pan American Drive Miami, FL 33133

Miami-Dade County Board of County Commissioners 111 NW 1st Street, Suite 250 Miami, Florida 33128

Miami City Commission 3500 Pan American Dr. Miami, Florida 33133

Dear Governor DeSantis, Senator Ana Maria Rodriguez, Mayor Daniella Levine Cava, Mayor Francis X. Suarez, Miami-Dade County Commissioners and Miami City Commissioners:

The Florida Department of Environmental Protection's (DEP) Office of Ecosystem Restoration is pleased to submit the Biscayne Bay Commission Semiannual Report per Section 163.11(7), F.S. Consistent with statute, this report is made available on the department's website as well as Miami-Dade County's website.

This report includes a list of the commission members, the elected Chair and Vice-Chair, the charge of the commission and work to date.

If you have any questions, please reach out to Adam Blalock at (850) 245-2031.

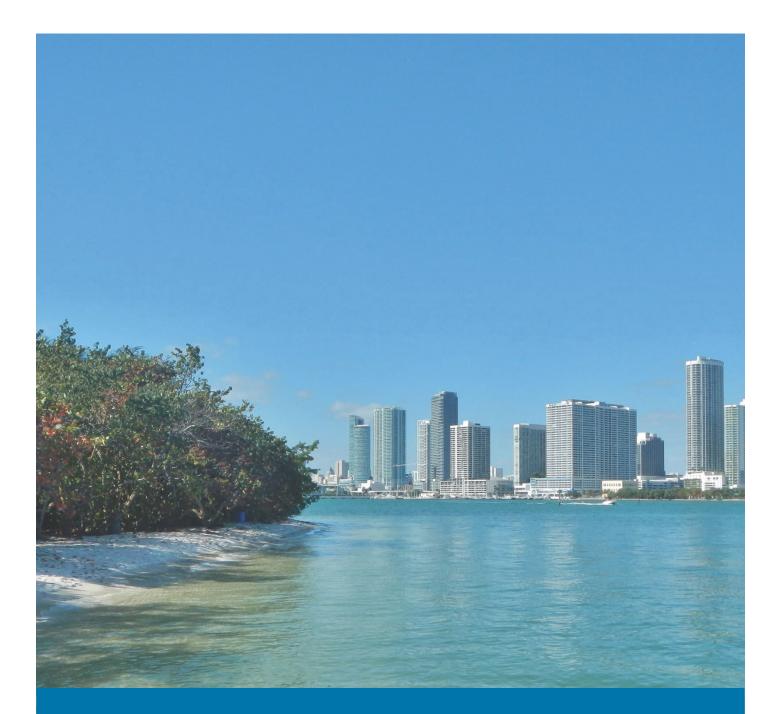

Respectfully,

Digitally signed by Shawn Hamilton Date: 2023.05.08 08:50:25 -04'00'

Shawn Hamilton Secretary Florida Department of Environmental Protection

Enclosure

cc: Adam Blalock, Deputy Secretary of Ecosystem Restoration, DEP Alex Kernan, Director of Legislative Affairs, DEP

BISCAYNE BAY COMMISSION Semiannual Report

May 2023

ABOUT THE BISCAYNE BAY COMMISSION

On June 3, 2021, Florida Governor Ron DeSantis took a major step forward in protecting vital natural resources within Biscayne Bay through the creation of the Biscayne Bay Commission. While Biscayne Bay is protected in its entirety by either a national park or state aquatic preserve, it faces global, regional and local stressors, including sea level rise, impaired water quality, habitat loss, and human activity that conflicts with resource protection. The governor supports direct action to address these issues.

The Biscayne Bay Commission will monitor the strategic plan and create an associated financial plan to fund its priorities in partnership with local agencies.

Commission meetings provide a forum for exchange and serve as a clearinghouse for public information on all plans, programs and projects being conducted.

To date, the commission has held six meetings, with the last occurring on Apr. 26, 2023. A copy of all <u>meeting agendas and additional materials</u> including past reports can be found online. This semiannual report is made available to describe the accomplishments of the commission and each member agency and the status of each pending task. This includes:

- Summary of any meetings since the last submitted semiannual report.
- Attachment A Project Tracker: Update by the commission and member agencies of all projects and tasks designed to improve Biscayne Bay. This document is a living Excel document where all member agencies provide updates on their respective projects and tasks. Information on the spreadsheet primarily includes project name, description, project type and project status.
- Attachment B Financial plan: Copy of the consolidated financial plan, inclusive of any necessary updates.

The commission shall submit a semiannual report describing the accomplishments of the commission and each member agency, as well as the status of each pending task, to the Miami City Commission, the Miami-Dade County Board of County Commissioners, the mayor of Miami, the mayor of Miami-Dade County, the Governor, and the chair of the Miami-Dade County Legislative Delegation. The report shall also be available on the Florida Department of Environmental Protection and Miami-Dade County websites.

Section 163.11(7), Florida Statutes

COMMISSION MEMBERS

Commission members were initially appointed to their seats between July and November 2021. Scott Wagner replaced Charlie Martinez in November 2022. Two seats are currently vacant and were filled in April 2023.

Commission members are Noah Valenstein, Kevin Cabrera, Micky Steinberg, Danielle Cohen Higgins, Tim Meerbott, Scott Wagner, Adam Blalock, Thomas Reinert and Spencer Crowley (Table 1).

Table 1. Biscayne Bay Commission member composition per establishing legislation.

CB/HB 1177 Appointment Requirements	Commission Member	Position Title
1. One member appointed by the Governor.	Noah Valenstein	Commission chair; Founder, Brightwater Strategies
2. Three members of the Miami- Dade Board of County Commissioners, appointed by the	Kevin Cabrera	Commissioner District 6 (represents Miami River inland area)
board.	Micky Steinberg	Commissioner District 4 (represents northern coastal bay)
	Danielle Cohen Higgins	Commissioner District 8 (represents southern coastal bay)
3. One member of the Miami-Dade County League of Cities who resides within the boundaries of a city that borders Biscayne Bay, nominated by the league and appointed by the secretary of the Florida Department of Environmental Protection. To the extent practicable, the league must nominate a member from each city that borders Biscayne Bay on a rotating basis.	Tim Meerbott	Mayor, Town of Cutler Bay
4. One member of the South Florida Water Management District Governing Board who resides in Miami-Dade County, appointed by the board.	Scott Wagner	Governing Board Member representing Miami-Dade County
5. One representative of the Florida Department of Environmental Protection, appointed by the agency's secretary.	Adam Blalock	Deputy Secretary of Ecosystems Restoration
6. One representative of the Florida Fish and Wildlife Conservation Commission, appointed by the commission.	Thomas Reinert	South Regional Director
7. One representative of the Florida Inland Navigation District, appointed by the district.	Spencer Crowley	Commissioner representing Miami-Dade County

MEETINGS SINCE THE LAST SEMIANNUAL REPORT

Nov. 30, 2022

The Biscayne Bay Commission held its fourth meeting on Nov. 30, 2022, at Florida International University's Biscayne Bay Campus and via GoTo webinar, welcoming nearly 100 participants to hear a presentation and discuss Miami-Dade County's Biscayne Bay Water Quality Improvement grant from the Florida Department of Environmental Protection. A range of activities were discussed from water quality characterization and modeling to stormwater and wastewater, as well as infrastructure and restoration.

Approved meeting minutes are posted to ProtectingFloridaTogether.gov/BiscayneBayCommission.

Commissioners Monestime and Sosa reached their respective term limits and vacated their seats. It is anticipated that these vacated seats will be filled prior to the next meeting in April 2023. Scott Wagner has replaced Charlie Martinez. Chair Valenstein thanked the outgoing commissioners and welcomed Wagner to the commission.

Feb. 15, 2023

The Biscayne Bay Commission held its fifth meeting on Feb. 15, 2023, at Florida International University's Biscayne Bay Campus and via GoTo webinar, welcoming approximately 100 participants to hear a presentation and discuss MS4 and industrial stormwater permitting, as well as the Biscayne Bay Water Quality Improvement Grant from the Florida Department of Environmental Protection. Florida DEP also facilitated a discussion on Biscayne Bay Strategic Planning, which will be presented at the meeting in April 2023.

Approved meeting minutes are posted to

ProtectingFloridaTogether.gov/BiscayneBayCommission.

Apr. 26, 2023

The Biscayne Bay Commission held its sixth meeting on Apr. 26, 2023, at Cutler Bay Town Hall and via GoTo webinar, welcoming approximately 60 participants to hear presentations regarding the United States Army Corps of Engineers Back Bay Study, monitoring by the Biscayne Bay Aquatic Preserve, and Miami-Dade County's MS4 permit. Florida DEP shared an update on Biscayne Bay Strategic Planning, which is still being drafted.

Draft meeting minutes are posted to

ProtectingFloridaTogether.gov/BiscayneBayCommission.

STATUS OF PENDING TASKS

Prior to the commission's inaugural meeting, initial steps were taken to make progress on the six tasks outlined below, taken from the establishing legislation. The commission has and will continue to discuss these tasks and how to address each at upcoming meetings. Tasks include:

- (a) Consolidate existing plans, programs and proposals, including the recommendations outlined in the <u>June 2020 Biscayne Bay Task Force report</u>, into a coordinated strategic plan for improvement of Biscayne Bay and the surrounding areas, addressing environmental, economic, social, recreational and aesthetic issues. The commission will continue to monitor the progress of each element of the plan and will revise the plan regularly.
 - Each commission member is tasked with bringing policy, ordinance and project ideas to future meetings for discussion.
 - The commission discussed looking at the project lists provided by the MDC Watershed Advisory Board and determining where there is an overlap to bolster protection of the bay.
 - The commission used the six categories listed in the June 2020 Biscayne Bay Task Force report to inspire discussion around developing a new strategic plan for Biscayne Bay.
- (b) Prepare a consolidated financial plan using the projected financial resources available from the different jurisdictional agencies. The commission will monitor the progress of each element of the plan and revise the plan regularly.
 - A suggestion was made at the inaugural meeting for member agencies to coordinate their lobbying efforts to make their individual requests more effective. Members with lobbyists will follow up.
 - With direction from the commission, member agencies have developed a consolidated financial plan by listing the financial resources each member agency has available to bear on future Biscayne Bay priority projects. The <u>consolidated financial report</u> is available online and is included here as <u>Attachment B</u>.
- (c) Provide technical assistance and support as needed to help implement each element of the strategic and financial plans.
 - DEP's Division of Environmental Assessment and Restoration provides technical support and data regarding Biscayne Bay impairments, water quality hot spot maps and analyses by basin.
 - The commission requested that the Florida Department of Transportation (FDOT) provide information regarding the agency's plans to address sea level rise along the causeways transiting Biscayne Bay and discussion of ways to build resilience (e.g., living shorelines) and restoration (e.g., improved water flow). In 2022, the Legislature passed, and the Governor signed into law House Bill 7053 (Chapter 2022-089, Laws of Florida) requiring FDOT to submit a resilient action plan by June 30, 2023, that could help inform this topic. This topic is being explored for a future meeting.
 - A discussion around a new strategic plan was held at the February meeting. Commissioners agreed on the strategic goals of water quality monitoring, public outreach, addressing sources of nutrients, and natural system restoration at the April meeting. There will be another update at the next meeting from Florida DEP.
- (d) Work in consultation with the U.S. Department of the Interior.
 - No updates to report. See January 2022 report.
- (e) Provide a forum for exchange of information.

- Commission meetings are public forums conducted in accordance with the Sunshine Law. Members of the public may submit written and oral comments during the meeting or <u>email comments after the meeting.</u>
- Coordination with the MDC Watershed Advisory Board:
 - MDC's chief bay officer is invited to provide an overview/update from the board at the MDC Watershed Advisory Board. Updates are available on the Biscayne Bay webpage. DEP also furnishes meeting summaries. In addition, the commission discussed these two groups magnifying awareness of the issue at hand and amplifying the potential for environmental change by using the same talking points for projects where all levels of government aggregate actions focus on one basin. Talking points will be co-developed once priority projects have been selected.
- (f) Act as a clearinghouse for public information.
 - The Biscayne Bay Commission website serves as a clearinghouse of information on the bay and the commission.
 - This and future reports as well as agendas and meeting materials will be posted online.

The Biscayne Bay Commission will continue to meet quarterly, and the next meeting date is TBD.

February 2023 Biscayne Bay Commission Semiannual Report

Lead Entity	Partners	Unique Project ID	Project Name	Project Description	July 2023 Semiannual Update	Project Type	Project Status
Coral Gables, City of		BB038	Sustainability and Climate Resiliency Goals	Identified sustainability and climate resiliency as a top priority in 2021. Allocated more than \$6 million to a sea-level rise mitigation fund and expects to set aside \$100 million by 2040.		Governance	Completed
Coral Gables, City of		BB037	Fertilizer Ordinance	Adopted the Florida Friendly Fertilizer Ordinance		Ordinance	Ongoing
Coral Gables, City of	Florida Department of Environmental Protection (DEP)	BB012	Coral Gables Waterway / Biscayne Bay Water Quality Improvements - Construction	Project will construct baffles and replace existing solid pipes with exfiltration trenches to treat and redirect stormwater runoff into an underground porous limestone layer.		Stormwater	Planned
Coral Gables, City of	DEP	BB013	King's Bay Septic-to-Sewer Conversion	Project proposes removal of approximately 150 septic tanks that currently receive sewer flows from the King's Bay community.		Sepitc-to-Sewer	Planned
Cutler Bay, City of		BB030	Land Acquisition	Purchased 8.45 acres of buffer land for conservation purposes adjacent to Biscayne Bay restoration projects		Land Acquisition	Completed
Cutler Bay, City of	South Florida Water Management District (SFWMD)	BB031	Wetland Restoration Adjacent to BBCW	Working to restore a 53-acre wetland adjacent to Biscayne Bay Coastal Wetlands in partnership with SFWMD		Hydrologic Restoration	Ongoing
Cutler Bay, City of		BB126	Stormwater Management	Rated FEMA CRS Class 4 for improving town's ability to mitigate potential flooding. \$4 million set asside for stormwater management.	Rated FEMA CRS Class 4 for improving town's ability to mitigate potential flooding. \$4 million set asside for stormwater management.	Stormwater	Updated
Cutler Bay, City of		BB127	Biscayne Bay Southern Everglades Ecosystem Restoration Footprints	Taken an active role in preventing incompatible development that would conflict with restoration plans, including purchasing land and passing resolutions to protect the Biscayne Bay Coastal Wetlands Project and Biscayne Bay Southern Everglades Ecosystem Restoration footprints.	Taken an active role in preventing incompatible development that would conflict with restoration plans, including purchasing land and passing resolutions to protect the Biscayne Bay Coastal Wetlands Project and Biscayne Bay Southern Everglades Ecosystem Restoration footprints.	Natural System Restoration	Updated
Cutler Bay, City of		BB128	Environmentally Endangered Lands Program	Replenishing funding for the Environmentally Endangered Lands Program	Replenishing funding for the Environmentally Endangered Lands Program	Funding	Updated
Florida Department of Environmental Protection (DEP)		BB043	Oleta River State Park Seagrass Restoration	Oleta River State Park has performed 2.3 acres of seagrass restoration. A time zero benthic survey report is on file including the collected data in tabular format and a GIS map for visual representation of the existing seagrass resources within the project area.		Natural System Restoration	Completed
Florida Department of Environmental Protection (DEP)		BB044	Oleta River State Park Septic Abatement	Three park facilities have been taken off septic and connected to sewer.		Sepitc-to-Sewer	Completed
Florida Department of Environmental Protection (DEP)		BB041	Turbidity Criterion	The Water Quality Standards Section has proposed revised turbidity criterion language as part of the department's triennial review of the water quality standards. The proposed revised turbidity criterion would provide additional protections for corals and coral habitats.		Data Collection and Evaluation	Ongoing

Lead Entity	Partners	Unique Project ID	Project Name	Project Description	July 2023 Semiannual Update	Project Type	Project Status
Florida Department of Environmental Protection (DEP)		BB042	Water Quality Analysis	The Department, through the Biscayne Bay Aquatic Preserve (BBAP) and the Division of Environmental Assessment and Restoration (DEAR) provide technical and analytical support in response to significant Biscayne Bay seagrass losses. DEAR staff also participate in Biscayne Bay fish kill and algal bloom response coordination calls. BBAP expanded its datasonde network into the Miami River, establishing two more sites along with the three existing datasonde sites in the Little River watershed. With the current datasonde network, BBAP has attained the largest continuously monitoring network by an aquatic preserve in the state. BBAP additionally has monthly water quality bottle grab sampling of 24 sites for tracking of 39 nutrients, septic tracers, pharmaceuticals, herbicides, insecticides and fungicides.		Data Collection and Evaluation	Ongoing
Florida Department of Environmental Protection (DEP)	FWCC	BB045	Oleta River State Park Mangrove Restoration	Restore two remnant mangrove systems in the park. These wetlands were impounded within the landscape during large-scale dredging and filling associated with coastal development in the 1950s and have been stressed due to failure of hydrologic connections to tidal flow. This project proposes to improve the function of the two die-off areas, totaling 26.7 acres of mangrove habitat, by reestablishing tidal flow through the maintenance or replacement of culverts.		Hydrologic Restoration	Ongoing
Florida Department of Environmental Protection (DEP)		BB046	Bill Baggs Cape Florida State Park Beach Cleanup	Over 4,000 volunteers have participated in coastal cleanups in 2021, removing tons of marine debris from the shorelines.	In progress	Marine Debris	Ongoing
Florida Department of Environmental Protection (DEP)		BB047	Barnacle Historic State Park Stormwater Runoff and Erosion Plan	The park's citizen support organization (CSO) hired a landscape architect to create a stormwater runoff and erosion plan. The Barnacle is now working with the Florida Park Service Bureau of Design and Construction and the city of Miami on permitting	The engineering consultant filed a City of Miami Special Permit Exception application on behalf of The Barnacle State Historic Park in January. It is currently awaiting review by the City's Planning Department.	Stormwater	Ongoing
Florida Department of Environmental Protection (DEP)		BB048	State Park Education	Florida's state parks, including Oleta River, Bill Brags Cape Florida, and Barnacle Historic State Parks maintain stewardship of the state park lands, which includes public education		Education	Ongoing
Florida Department of Environmental Protection (DEP)		BB049	State Park Litter and Marine Debris Removal	Florida's state parks, including Oleta River, Bill Brags Cape Florida, and Barnacle Historic State Parks maintain stewardship of the state park lands, which includes litter and marine debris removal		Marine Debris	Ongoing
Florida Department of Environmental Protection (DEP)		BB050	State Park Invasive Plant Management	Florida's state parks, including Oleta River, Bill Brags Cape Florida, and Barnacle Historic State Parks maintain stewardship of the state park lands, which includes invasive removal		Natural System Restoration	Ongoing
Florida Department of Environmental Protection (DEP)		BB051	Biscayne Bay Aquatic Preserve Litter and Marine Debris Removal	Assistance in derelict vessel reporting and illegal crab pot removals during the FWC 2021 crab pot closure assisted the restoration of submerged lands, while the bay's islands were targeted through three major efforts. BBAP continued its decades-long history of hosting an International Coastal Cleanup site, which has removed 1,000 pounds of marine debris. Secondly, BBAP's Adopt-an-Island Program saw 16 cleanups from its adopters, who removed almost 2,000 pounds of debris from the bay's islands. This past fall, BBAP initiated a National Oceanic and Atmospheric Administration (NOAA) Marine Debris grant funded contract to remove Hurricane Irma debris from 13 of BBAP's islands. Six islands have been cleaned with the removal of almost 10 tons of debris with the remaining seven to be completed in early 2022.	BBAP is activity removing marine debris from the bay through a combinations of programs, including their Adopt and island program, volunteer based island and mangrove clean ups, and a NOAA grant to remove larger items left from Irma	Marine Debris	Ongoing
Florida Department of Environmental Protection (DEP)		BB052	Biscayne Bay Aquatic Preserve's Rookery Island Bird Monitoring Program	BBAP established the only island-based bird count, BBAP's Rookery Island Bird Monitoring Program	BBAP heads out on to the water at sunrise monthly to monitor our bird rookery populations and scan for nest.	Data Collection and Evaluation	Ongoing
Florida Department of Environmental Protection (DEP)	FWCC	BB054	Stony Coral Tissue Loss Disease Response	Efforts include coral rescue, intervention experiments, coral restoration trials, coral disease monitoring, strategic sampling and laboratory analyses, and data management.		Data Collection and Evaluation	Ongoing

Lead Entity	Partners	Unique Project ID	Project Name	Project Description	July 2023 Semiannual Update	Project Type	Project Status
Florida Department of Environmental Protection (DEP)		BB053	Biscayne Bay Aquatic Preserve Sponge Propogation Project	A water quality restoration project achieved via sponge propagation will provide examples of water quality benefits from expanding the ecosystem services of a group of species that currently exist in the bay and provide benefits to other protected species, such as seagrasses and corals. This project, the first of its kind in Biscayne Bay, will be executed without disturbing seagrass habitat by utilizing existing bay resources and salvaging sponges removed during construction projects.	BBAP's sponge program is in the building stages and is working on determining the best methods for propagation and attachment. Once finished the program will produce a viable method to propagate sponges through the bay to increase water quality and store sponges during marine construction projects.	Natural System Restoration	Planned
Florida Department of Environmental Protection (DEP)		BB133	Coral Protection and Restoration (CPR) Program	CPR within DEP's office of Resilience and Coastal Protection administers state funds appropriated for the protection and restoration of Florida's Coral Reef, including the reduction of local stressors like land-based sources of pollution. In FY 2020-21, \$10 million in grant funding was awarded to Miami-Dade County to support identification of pollutior hotspots; construction solutions leading to reduced stormwater and wastewater related nutrient inputs to surface waters of the Biscayne Bay Aquatic Preserves, and biological restoration in support of protecting Florida's Coral Reef.		Funding	Updated
Florida Department of Environmental Protection (DEP)		BB134	Oleta River State Park Exotic Plant Removal and Intracoastal Cleanup	The park's citizen support organization (CSO) facilitates native plantings and provides educational programs and events together with park staff and partners. Florida Department of Environmental Protection (DEP)	Miami River Fund Inc.		Stormwater Management of Miami River Basin Project	Includes use of the following technologies: The Scavenger Water Decontamination vessel, private sector vacuum trucks, street sweeper truck services and manual removal of debris and invasive species from curbs, gutters and shorelines to improve water quality of the Miami River.		Stormwater	Completed
Florida Department of Environmental Protection (DEP)	Key Biscayne, Village of		Green Stormwater Infrastructure Project	This project will install green infrastructure along the right-of-way of a flood prone corridor along West Heather Drive from Allendale to Palmwood. This project will test materials, designs, and configurations of green infrastructure to inform the design of the system Village-wide. The Village will test water samples to determine the degree to which green infrastructure like bioswales, porous materials, and native plants improves water quality discharging through outfalls into Biscayne Bay.		Stormwater	Ongoing
Florida Department of Environmental Protection (DEP)	North Miami, City of		Septic to Sewer Conversion	This project aims to convert 153 septic systems to the City of North Miami's wastewater system.		Sepitc-to-Sewer	Planned
Florida Department of Environmental Protection (DEP)	Miami Springs, City of		Oakwood Drive Sotrmwater and Road Improvements	The project includes a range of best management practices, such as the construction of exfiltration trenches, catch basins, a nutrient separating baffle box, and a pump station. The project aims to improve water quality by capturing debris and storing runoff to minimize nutrient leaching into the C6- Miami Canal, which discharges to Biscayne Bay.		Stormwater	Planned
Florida Department of Environmental Protection (DEP)	Coral Gables, City of		Sanitary Sewer Coastal Rehabilitation Phase	City to rehabilitate approximately 30,000 L.F. of gravity sewer and associated manholes by performing cement grouting, slip lining, cured-in-place pipe, pipe bursting, and point (spot) repair or minor pipe replacement. This will help to reduce leakage of wastewater out of the sewer system that occurs due to cracked or damaged pipes and manholes.		Stormwater	Completed
Florida Department of Environmental Protection (DEP)	Miami - Dade County (MDC)		Phase 3 - Continued Implementation of Biscayne Bay Task Force Recommendations	Phase 3- Identification of pollution hotspots, construction solutions leading to reduced nutrient inputs to surface waters of Biscayne Bay Aquatic Preserves, and biological restoration in support of protecting Florida's Coral Reef. FWC law enforcement has a strong presence on the waters of Biscayne Bay.	In Miami-Dade County, from Jan. 1 - June 1, 2022, FWC officers issued the following boating and resource citations and warnings, a large portion of which were in Biscayne Bay, including 1,979 boating citations; 313 resource citations; and 514 warnings	Programmatic	Updated
Florida Inland Navigation District (FIND)		BB056		The Waterway Assistance Program is a grant program established by the Florida Legislature and the District for the purpose of financially cooperating with local governments to alleviate problems associated with the Atlantic Intracoastal Waterway and associated waterways within the District. Waterway related projects must be located on natural, navigable waterways within the District. Eligible waterway related projects include navigation channel dredging, channel markers, navigation signs or buoys, boat ramps, docking facilities, fishing & viewing piers, waterfront boardwalks, inlet management, environmental education, law enforcement equipment, boating safety programs, beach re-nourishment, dredge material management, environmental mitigation, and shoreline stabilization.	1	Programmatic	Ongoing
Florida Inland Navigation District (FIND)	Multiple	BB060	Small-Scale Derelict Vessel Removal Program	Derelict Vessels in District waterways can cause navigation safety and environment problems. The District provides assistance funding up to \$50,000 per county per year to assist other governments with derelict vessel removal projects.		Marine Debris	Ongoing
Florida Inland Navigation District (FIND)	Miami-Dade County	BB061	Waterfront Recreational Access Plan	In 2018, FIND awarded Miami-Dade County a \$100,000 grant to develop a master plan for public access to county waterways. The plan's purpose is to "provide an interconnected blueways system with improved public access and recreational opportunities to Biscayne Bay and Miami-Dade County's waterways in order to encourage residents and visitors to enjoy, responsibly use and protect these unique natural ecosystems." When complete, the access plan will provide local, state and regional governmental interests with a roadmap to increase public access to the bay.		Governance	Ongoing
Florida Inland Navigation District (FIND)		BB062	Flood Shoal and Intracoastal Waterway (IWW) Channel at Haulover Inlet	The Bal Harbor Shore Protection project includes 90,000 CY obtained from dredging and approximately 110,000 CY from truck haul. Material will be placed on the beach betweer R-27 and R-31.3. Out of the 90,000 CY being dredged, approximately 25% will be dredged from the Bakers Haulover reach of the Intracoastal Waterway. This material is located within a problematic flood shoal that is north of the inlet. The removal of this material from the flood shoal has multiple benefits. First, material removement from the flood shoal will act as advance maintenance, lessening the shoaling that would be expected to be deposited into the IWW. Second, the dredging of material from the IWW and placement on the beach is a prime example of beneficial use, removing material at the benefit of one project to benefit another.		Natural System Restoration	Ongoing
Florida Inland Navigation District (FIND)	Multiple	BB063	FIND Cooperative Assistance Program	Cooperative Assistance Programs are grant programs established for the purpose of financially cooperating with local governments carrying out public navigation, increasing boater access, local and regional mooring field management, public recreation/waterfront parks, inlet management, environmental education, and boating safety projects, directly related to the waterways and to alleviate problems associated with the Atlantic Intracoastal Waterway and associated waterways within the District.		Programmatic	Ongoing
Florida Inland Navigation District (FIND)	Multiple	BB064	FIND Interlocal Agreement Program	The Waterway Assistance Program is a grant program established by the Florida Legislature and the District for the purpose of financially cooperating with local governments to increase public access associated with the Atlantic Intracoastal Waterwa and associated waterways within the District.	у	Programmatic	Ongoing

Florida Inland Navigation District (FIND)	Miami-Dade County	BB065	FIND Waterway Cleanup Program	The waterways in the District can accumulate trash and debris from many sources. The District sponsors voluntary waterway cleanups in each of the 12 counties with Keep Florida Beautiful affiliates as well as Marine Industry Associations and others. Eligible applicants may be funded in accordance with Rule No. 66B-2.016 of the Florida Administrative Code.		Marine Debris	
Florida Inland Navigation District (FIND)	Multiple	BB066	FIND Small-Scale Spoil Island Enhancement and Restoration Program	FIND Small-Scale Spoil Island Enhancement and Restoration Program - The District has elected to develop a Small-Scale Spoil Island Enhancement Program to foster "adoption & stewardship" of these islands. This program is intended to provide general improvements cleanup and maintenance to these islands. The District intends to seek the most technically sound and cost-effective proposals that specifically address the enhancement, improvement and maintenance of spoil islands of the Waterway.	,	Natural System Restoration	
Florida International University - Institute of Environment	Florida DEP	BB014	Biscayne Bay and Reef Observation, Interpretation and Prediction System (B-BROIPS)	Project will fill data gaps, build a unified and open data and visualization portal, create predictive models at levels from statistical to mechanistic and then provide the predictions needed for informed management decisions influencing bay and reef.		Data Collection and Evaluation	Planned
Key Biscayne, Village of	Florida DEP	BB015	Stormwater Sustainability Pilot Project	Pilot to demonstrate the effectiveness and benefits of capturing stormwater run-off pollutants captured at the source. Includes installation and monitoring of Ultra-Urban Filters (UUFs), under-grate filter baskets, and curb inlet filters within the K-8 School Basin.		Stormwater	Planned
Miami Beach, City of		BB028	Climate Initiative	Established a climate action goal to reach net zero emissions by 2050		Governance	Completed
Miami Beach, City of		BB027	Plastic Free Ordinance	Passed a plastic free ordinance, a plastic straw ordinance and an expanded polystyrene ordinance, becoming the first municipality in Florida to do so and was the inspiration for county-wide passage of the Plastic 305 initiative.		Ordinance	Ongoing
Miami Beach, City of		BB029	Fertilizer Ordinance	Adopted DEP's model ordinance for fertilizer use for urban landscapes, alongside additional and more stringent standards related to the use of nitrogen and phosphorus-based fertilizers.		Ordinance	Ongoing
Miami Shores, Village of	Florida DEP	BB016	Miami Shores-NE 8th Avenue Drainage Improvement Project	This project mitigates flooding during heavy rain events and protects Biscayne Bay. It connects to Biscayne/Blvd./State Road 1 (evacuation route), and planned improvements help ensure that all roads leading to evacuation exit routes remain passable.		Stormwater	Planned
Miami Waterkeeper	Florida DEP	BB017	Improving Water Quality in Biscayne Bay through Coordination, Outreach, Monitoring, and Source Tracking	Establish coordination between scientists and agencies for water quality events; monitor fecal indicator bacteria (FIB) in Biscayne Bay weekly; analyze an EPA-funded dataset correlating nutrients, FIB, and land use and generate management recommendations .		Data Collection and Evaluation	Ongoing
Miami, City of	FIND	BB057	Virginia Key Seawall, Dock and Kayak Launch	The Virginia Key seawall, dock and kayak launch at Shrimper's Lagoon		Recreation	Completed
Miami, City of	FIND	BB058	Spring Garden Park Seawall and Kayak Launch	Spring Garden Park Seawall and Kayak Launch		Recreation	Completed
Miami, City of	FIND	BB059	Dinner Key Marina Redevelopment	Dinner Key Marina Redevelopment			Completed
Miami-Dade County (MDC)		BB106	BBTF-5D	Conduct an analysis of marine debris in Biscayne Bay	City of Miami partnership with Ocean Conservancy on a Circularity Assessment Protocol (CAP) a tool that can give us a clear picture of the lifecycle of plastics and debris in the city of Miami.	Marine Debris	Completed
Miami-Dade County (MDC)		BB125	BBTF-7G	Identify and establish dedicated and recurring funding sources to pay for marine debris prevention and removal activities	The Biscayne Bay Environmental Enhancement Trust Fund has been ideintied as a funding source in addition to the general fund.	Funding	Completed

Lead Entity	Partners	Unique Project ID	Project Name	Project Description	July 2023 Semiannual Update	Project Type	Project Status
Miami-Dade County (MDC)		BB001	MDC's Chief Bay Officer	Chief Bay Officer acts as an advisor to the Mayor and Board of County Commissioners and advocates on matters related to the health and recovery of Biscayne Bay.		Governance	Completed
Miami-Dade County (MDC)		BB002	MDC's Biscayne Bay Task Force	Task force made up of nine members consisting of professionals and the community at- large, who review relevant data, prior studies and reports related to Biscayne Bay and determine how various issues may affect residents and property owners.		Governance	Completed
Miami-Dade County (MDC)		BB003	MDC's Biscayne Bay Website and Report Card	MDC provides website as a public service to its residents and visitors. The Biscayne Bay Report Card evaluates water quality, habitat, and fisheries in Biscayne Bay as the three representative aspects of the Bay's overall ecological health.		Education	Completed
Miami-Dade County (MDC)		BB005	"Protect Biscayne Bay" Speciality License Plate	MDC Partnered with the Miami Foundation and unveiled a Protect Biscayne Bay specialty license plate. Funds from the sale of the license plate will be directed to the Miami Foundation who will house the Biscayne Bay Recovery Fund.		Education	Completed
Miami-Dade County (MDC)		BB006	Biscayne Bay Watershed Management Advisory Board	The Biscayne Bay Watershed Management Advisory board was created by the Board of County Commissioners (BCC), through Ordinance No 21-72 as recommended by the Biscayne Bay Task Force. It establishes a permanent board to advise the BCC and the County Mayor on issues related to Biscayne Bay.		Governance	Completed
Miami-Dade County (MDC)		BB080	BBTF-2A	Establish by ordinance a Biscayne Bay Watershed Management Board (WMB)	Adopted Ordinance to create and established the Miami-Dade County Biscayne Bay Watershed Management Advisory Board	Governance	Completed
Miami-Dade County (MDC)	Multiple Cities and FDEP	BB067	BBTF-1A	Reasonable Assurance Plan (RAP) for Biscayne Bay with DEP.	Currently developing Reasonable Assurance Plan for Biscayne Bay with FDEP for the first phase.	Water Quality	Ongoing
Miami-Dade County (MDC)		BB068	BBTF-1B	Screenshot below:	Department of Regulatory and Economic Resources Division of Environmental Management (RER DERM) working on calculations pre and post projects in Northern Biscayne Bay through the RAP process.	Water Quality	Ongoing
Miami-Dade County (MDC)		BB069	BBTF-1C	Activate additional Department of Regulatory and Economic Resources' (RER) resource management functions	RER DERM created the water resources section and increased staff to focuse on Biscayne Bay recovery efforts.	Water Quality	Ongoing
Miami-Dade County (MDC)		BB070	BBTF-1D	County should conduct an immediate assessment of land-based hotspot areas prioritized based on existing, known impairments.		Water Quality	Ongoing
Miami-Dade County (MDC)		BB071	BBTF-1E	Review, develop (as needed), implement and enforce local ordinances and policies to attain pollution load reduction goals set forth in the Watershed Restoration Plan (WRP)	RER DERM currently updating Chapter 24 of the code to improve stormwater and septic systems operations and maintenance	Water Quality	Ongoing
Miami-Dade County (MDC)		BB072	BBTF-1F	Coordinate, staff and provide an annual budget for comprehensive, centralized Biscayne Bay Watershed data and research coordination and data management infrastructure	Collaborating with academia and tech industry to develop outline and plan	Water Quality	Ongoing
Miami-Dade County (MDC)		BB073	BBTF-1G	Undertake and secure funding for new pilot projects and research projects focused on reducing pollutant loads	Implementing pilot projects with State funding to install additional stormwater grates, smart sensors, baffle boxes, and similar mechanisms and technologies; pilot projects; and research projects.	Water Quality	Ongoing
Miami-Dade County (MDC)		BB076	BBTF-1J	Initiate and fund studies that illuminate specific knowledge gaps for application toward watershed restoration	RER DERM currently working on studies with academic partners.	Water Quality	Ongoing

Lead Entity	Partners	Unique Project ID	Project Name	Project Description	July 2023 Semiannual Update	Project Type	Project Status
Miami-Dade County (MDC)		BB077	BBTF-1L	Increase compliance of all marinas and commercial operations along waterways	Chief Bay Officer collaborating with Miami Dade County Parks and Recreation & Miami Dade Police Department to improve education and enforcment efforts.	Water Quality	Ongoing
Miami-Dade County (MDC)		BB078	BBTF-1M	Continue to monitor the progress of the October 7th, 2015 Consent Agreement between FP&L and Miami-Dade County		Water Quality	Ongoing
Miami-Dade County (MDC)		BB079	MDC - SI1	Spoil Island Contract	Disbursement of \$550,000.00 from Biscayne Bay Environmental Enhancement Trust Fund to conduct environmental enhancement for trash removal on spoil islands in Biscayne Bay.	Marine Debris	Ongoing
Miami-Dade County (MDC)		BB081	BBTF-2D	Develop a formal partnership in the form of a Memorandum of Understanding (MOU) with the SFWMD	Approved cost-share partnership with the South Florida Water Management District (SFWMD) to update the 2005 Biscayne Bay Economic Study, to bring such partnership agreement to this Board for approval as quickly as possible, and to identify sufficient legally available funds in such agenda item.	Governance	Ongoing
Miami-Dade County (MDC)		BB082	BBTF-2E	Enable the alignment and coordination of County departments that takes a holistic, comprehensive approach to Biscayne Bay recovery and resilience	Chief Bay Officer with the support of the County Mayor are working cross departments to coordinate recovery efforts.	Governance	Ongoing
Miami-Dade County (MDC)		BB084	BBTF-3A	Increase compliance with existing laws to result in the immediate connection of ~12,000 properties to the sewer system	Miami-Dade Water & Sewer initiated the first phase of connections in northern Biscayne Bay. Currently planning the phase two.	Infrastructure	Ongoing
Miami-Dade County (MDC)		BB087	BBTF-3D	Undertake immediate efforts to identify and eliminate all root causes of Sanitary Sewer Overflows (SSO) including inflow and infiltration. Accelerate sewer infrastructure maintenance and upgrades	Miami-Dade Water & Sewer working with consultant to design redudant sewer mains, identify the most at risk for failure.	Infrastructure	Ongoing
Miami-Dade County (MDC)		BB088	BBTF-3E	Develop and expedite a Condition Assessment and Asset Management Action Plan to document the condition of the County's wastewater system assets and certify all historical "As Builts" and/or those not already certified with a focus on identifying horizontal and vertical locations of main wastewater transmission lines	Adopted resolution to undertake an effort to update the historical "As-Builts" for County-owned sewer infrastructure that is eight-inches in diameter or greater and which "As-Builts": (a) are over 25 years old or (b) were not prepared by a Florida- licensed Professional Land Surveyor. This Board further directs the County Mayor or County's Mayor designee to prioritize the part of this project that focuses on updating the historical "As-Builts" for County-owned sewer infrastructure that is eight inches or greater in diameter and located within a quarter mile of any canal or body of water that discharges to Biscayne Bay.	Infrastructure	Ongoing
Miami-Dade County (MDC)		BB090	BBTF-3G	Develop a plan to prioritize the retrofitting of stormwater infrastructure within basins with the most substantial water quality and/or habitat degradation issues	Pilot projects underway	Infrastructure	Ongoing

Lead Entity	Partners	Unique Project ID	Project Name	Project Description	July 2023 Semiannual Update	Project Type	Project Status
Miami-Dade County (MDC)		BB091	BBTF-3H	Eliminate direct and indirect stormwater discharges to Biscayne Bay	1. Stormwater pilot projects - See item BB073 2. Miami-Dade Water & Sewer Department (WASD) Capital Improvement Plan replacing of sewer mains. 3. updating design standards for septic and stormwater systems.	Infrastructure	Ongoing
Miami-Dade County (MDC)		BB093	BBTF-3K	Ensure that new infrastructure projects to address coastal flooding and storm surge that are cost-shared by the County adhere to the recommendations of this Task Force and prioritize Biscayne Bay health and resilience	MDC Office of Resilence	Infrastructure	Ongoing
Miami-Dade County (MDC)		BB098	BBTF-4E	Prioritize existing and identify new green and blue infrastructure approaches and restoration projects	RER DERM, Office of Resilience working with academia and private sector to review potential solutions for sea level rise.	Watershed Habitat Restoration and Natural Infrastructure	Ongoing
Miami-Dade County (MDC)		BB099	BBTF-4F	Continue to work with SFWMD and to have the State of Florida allocate the funds necessary to ensure the timely commencement of construction of the Cutler Flow Way in accordance with the project timeline in the Integrated Delivery Schedule.	Finalizing transfer of property to SFWMD	Watershed Habitat Restoration and Natural Infrastructure	Ongoing
Miami-Dade County (MDC)		BB100	BBTF-4G	Continue to advocate for funding to support the Biscayne Bay Southern Everglades Ecosystem Restoration (BBSEER) project (also known as the BBCW / C-111)	MDC adopts urgings annually to adds CERP to legislative package. BBCW Phase 1 final construction and BBSEER planning process have been fully funded.	Watershed Habitat Restoration and Natural Infrastructure	Ongoing
Miami-Dade County (MDC)		BB102	BBTF-41	Accelerate green infrastructure solutions for flooding, resiliency and water quality	1. MDC working on building resilience in secondary canal system with elevating canal banks. 2. In partnership with SFWMD to develop strategies to SFWMD's level of service for C7, C8 & C9. 3. Partnering with SFWMD on grant proposals for Innovative Water Technology.	Watershed Habitat Restoration and Natural Infrastructure	Ongoing
Miami-Dade County (MDC)		BB103	BBTF-5A	Create a comprehensive marine debris prevention, reduction, and removal program within DERM and to adequately fund and staff the program	Received approval from DERM Director's Office to create a scope of work to bid out the development of a comprehensive marine debris plan, to be informed by the goals and objectives identified by the marine debris planning team and to include, at a minimum, the following: 5D, 5E, 5F, and 5G	Marine Debris	Ongoing
Miami-Dade County (MDC)		BB104	BBTF-5B	Establish a marine debris working group to promote collaboration on ways to reduce marine debris	RER DERM working with consultant, municipalities and stakeholders to develop plan through workshops and charrettes.	Marine Debris	Ongoing
Miami-Dade County (MDC)		bb	BBTF-5C	Through the Miami-Dade County Police Department (MDPD), direct the Marine Patrol Unit to prioritize its commitment to the enforcement of all applicable laws having a nexus to the environmental health of the Bay and its tributaries	Chief Bay Officer collaborated with Miami Dade Police Department to increase law enforcement presence in Biscayne Bay and tributaries by increased FTEs. MDPD conducted Earth Day clean up activity to show commtiment towards Biscayne Bay recovery efforts.	Marine Debris	Ongoing

Project will integrate and expand asexual and sexual propagation activities for Miami- Dade and Broward Counties.		Data Collection and Evaluation	Ongoing

BISCAYNE BAY COMMISSION - FINANCIAL PLAN WATER RESOURCE FUNDING APPLICABLE TO BISCAYNE BAY

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

Division of Water Restoration Assistance

The Florida Department of Environmental Protection's (DEP) <u>Division of Water Restoration</u> <u>Assistance</u> provides loans and grants to local governments, utilities and other agencies for projects that improve the quality and quantity of the state's water resources and provide a significant benefit to the environment and local communities. These projects improve stormwater quality; reduce pollutants entering surface water and groundwater; conserve energy or water; protect springs; collect and treat wastewater; produce and distribute drinking water; provide alternative water supply; and restore potable water for homeowners in areas affected by declining source water quality.

For more information about any of the grant or loan programs below, visit <u>FloridaDEP.gov</u> or contact Angela Knecht at <u>Angela.Knecht@FloridaDEP.gov</u> or 850-245-2934.

State Revolving Fund Program

The division's largest program is Florida's <u>State Revolving Fund</u>, funded through money received from federal grants and state contributions. These funds then "revolve" through the repayment of previous loans and interest earned. While these programs offer loans, grant-like funding is also available for qualified small, disadvantaged communities, which reduces the amount owed on loans by the percentage that the community qualifies. Projects are considered for funding each August, November, February and May depending on funding, and the initial paperwork to be considered at these meetings must be submitted 45 days in advance of those meetings (The details and paperwork are available at the links below).

• The <u>Clean Water State Revolving Fund</u> (CWSRF) is Florida's largest financial assistance program for water infrastructure, providing low-interest loans to local governments to plan, design, and build or upgrade wastewater, stormwater and nonpoint source pollution prevention projects. Certain agricultural best management practices may also qualify for funding. The loan terms include a 20-year amortization and low-interest rates.

• <u>Small Community Wastewater Facility Grants</u> are available for the construction of wastewater facilities in municipalities with 10,000 or fewer people and per capita income levels below Florida's average per capita income. These grants are incorporated into and must accompany a CWSRF loan.

• The <u>Drinking Water State Revolving Fund</u> (DWSRF) provides low-interest loans to local governments and certain private utilities to plan, design, build or upgrade drinking water systems. Discounted assistance for small communities may be available. Principal forgiveness may also be available for disadvantaged communities. The loan terms include a 20-year amortization and low interest rates.

Nonpoint Source Funds

The Nonpoint Source Program (NPS) provides funding for control of water pollution from nonpoint

Page 1 of 14

sources and is managed by DEP's NPS Management Program.

The program administers federal and state grant funding for projects that reduce stormwater pollution from nonpoint sources, particularly to address impaired waterbodies and meet restoration goals related to total maximum daily loads (TMDLs) and restoration plans. These funds to construct traditional and green stormwater infrastructure projects to treat nutrient pollution in impaired waters are primarily granted to local governments (county and municipal governments; special districts; water management districts; other state agencies; public universities/colleges; and national estuary programs located in Florida). The federal <u>Clean Water Act section 319(h) grant</u> from the U.S. Environmental Protection Agency can also be used to implement demonstration of agricultural best management practices, abandon septic tanks and connect residents to sewer, and education campaigns targeting behavior change to reduce personal pollution to waterbodies.

NPS project proposals may be submitted anytime throughout the year. Department review and evaluation periods are expected to occur in September/October and March/April of each year or as needed. If the project is not funded in the first selection cycle (September/October), it will be considered in the following cycle (March/April) with no need to resubmit, unless there is a need to update the proposal. However, if a previously submitted project is not selected within the current state fiscal year, the proposal will need to be resubmitted for evaluation.

Wastewater Grant Program

The <u>Wastewater Grant Program</u> (WWGP) provides grants to governmental entities for wastewater projects that reduce excess nutrient pollution within a basin management action plan (BMAP), an alternative restoration plan adopted by final order or a rural area of opportunity (RAO). The program requires at least a 50% match that may be waived by the department for RAOs.

Projects to construct, upgrade or expand wastewater facilities to provide advanced wastewater treatment and connect septic tanks to sewer systems are prioritized. Consideration is given to nutrient reductions; project readiness; cost effectiveness; overall environmental benefit; project location; local matching funds; and water savings and water quality improvement. Please refer to <u>section 403.0673</u>, Florida Statutes, for the full description of the Wastewater Grant Program statute. Project proposals for each fiscal year are to be submitted via <u>ProtectingFloridaTogether.gov</u>.

Innovative Technology Grant Program

The Innovative Technologies Grant Program is available to local governmental entities for projects that evaluate and implement innovative technologies and short-term solutions to combat algal blooms and nutrient enrichment, restore and preserve Florida waterbodies, and implement certain water quality treatment technologies. It has received \$10 million each year for the past three years and \$15 million for Fiscal Year 2022-23.

Project proposals for each fiscal year can be submitted at ProtectingFloridaTogether.gov.

Office Of Resilience and Coastal Protection

The Office of Resilience and Coastal Protection (RCP) is committed to helping prepare Florida's communities and habitats for changes resulting from sea level rise by providing funding and technical

Page 2 of 14

assistance to coastal communities and continuing to promote and ensure a coordinated approach to sea level rise planning among state, regional and local agencies.

- The <u>Resilient Florida Program</u> includes a selection of grants that are available to counties, municipalities, water management districts, flood control districts, regional resilience entities and other eligible entities. To effectively address the impacts of flooding and sea level rise that the state faces, eligible applicants may receive funding assistance for planning grants to analyze and plan for vulnerabilities as well as implementation grants for adaptation and mitigation. Please refer to <u>section 380.093, F.S.</u>, for more information on the available grant programs, definitions and required parameters. Project proposals can be submitted July 1 – September 1 each year via <u>DEP's Grants Portal</u>. To learn more, visit DEP's Resilient Florida Program online, call 850-245-7600 or email <u>Resilience@FloridaDEP.gov</u>.
- The <u>RCP Project Funding Sources list</u> includes information about grant opportunities that are available for local governments, state agencies and other eligible entities to help plan, design, manage or construct projects such as vulnerability assessments, adaptation plans, beach and inlet management, public access needs, coral protection, and marina waste pump handling.

FLORIDA DEPARTMENT OF ECONOMIC OPPORTUNITY

The <u>Florida Department of Economic Opportunity</u> (in collaboration with its partners assists the Governor in advancing Florida's economy by championing the state's economic development vision and by administering state and federal programs and initiatives to help visitors, residents, businesses and communities.

• The <u>Florida Small Cities Community Development Block Grant</u> (CDBG) Program is a competitive grant program that awards funds to units of local government in small urban and rural areas. Florida receives \$18 to \$26 million annually from HUD to award subgrants to eligible units of local government.

The program provides an excellent opportunity for communities to obtain funds for projects that they cannot otherwise afford. CDBG funds can also provide administrative support for local governments that may not have the staffing resources necessary to administer their projects.

Examples of CDBG funded projects include water and sewer improvements; rehabilitation of substandard housing; street and sidewalk improvements; economic development activities that create jobs for low- and moderate-income people; downtown revitalization, including facade improvements, streetscaping, and underground utilities; park facilities and community centers; and drainage/stormwater improvements.

Page 3 of 14

 The <u>Rural Community Development Revolving Loan Program</u> (RCDRL) was created by the 1996 Florida Legislature to facilitate the use of existing federal, state and local financial resources by providing local governments with access to financial assistance to further promote the economic viability of rural communities. This program is intended to be highly flexible, and the loan amounts will vary depending on the need of applicants. It will provide term loans to local governments or to economic development organizations substantially underwritten by a unit of local government; within counties with populations of 75,000 or fewer or a contiguous county of 125,000 or fewer as stated in <u>section 288.065</u>, F.S. The long-term goals of the RCDRL include the creation of jobs for the residents of rural Florida and an increase in economic vitality and diversification for these areas.

For more information, visit the <u>RCDRL website</u> or contact Tina Grow at 850-717-8533 or <u>Tina.Grow@DEO.MyFlorida.com</u>.

• The <u>Technical Assistance Planning Grants</u> Program provides funding for Community Planning Technical Assistance (CPTA) Grants for counties, municipalities and regional planning councils with the opportunity to create innovative plans and development strategies to promote a diverse economy, vibrant rural and suburban areas while meeting statutory requirements for planning and protecting environmentally sensitive areas. Understanding that many Florida communities have been impacted by hurricanes, CPTA Grants may also be used for disaster recovery, resiliency and economic development planning.

ENTERPRISE FLORIDA

Enterprise Florida is a public-private partnership of business and government leaders with the goal of promoting Florida as a premier business destination and expanding the state's economy through private-sector job creation. Enterprise Florida works closely with a statewide network of economic development partners and is a resource for a variety of public and private projects and activities, including those in rural communities, to facilitate the creation, capital investment, strengthening and diversification of local economies by promoting tourism, trade and economic development. The various Enterprise Florida programs and financial incentives are intended, among other things, to provide additional financial assistance to enable communities to better access other infrastructure funding programs.

• Resources for Rural Communities: Enterprise Florida's Rural Expansion Toolkit includes grant opportunities for marketing and training, consulting services and site preparedness in Florida's rural communities, including development and enhancement of sites to make them build-ready and competitive for site selection projects. Grant funds may be available for, but are not limited to, the following types of activities: matching funds for federal grants; renovation of existing building or demolition of old buildings (county or city-owned); stormwater project for potential commercial sites; phase one environmental study; gas line extension; water and sewer construction or upgrade; access road construction (including engineering or architecture costs); or other approved infrastructure costs.

Grants within this program are eligible for reimbursement up to \$25,000 with a 24-month term beginning upon the execution of the grant contract. Learn more about the program.

Applications will be accepted from local or regional economic development or community partners located within a rural community – as identified in <u>288.0656(e), F.S.</u> – that can demonstrate a

pathway to site readiness. Visit <u>www.enterpriseflorida.com/rural/resources-rural-communities</u> to learn more about the Rural Expansion Toolkit as well as other local, state and national economic development resources.

The Environmental Finance Center Network (EFCN) is a university-based organization creating innovative solutions to the difficult how-to-pay issues of environmental protection and improvement. The EFCN works with the public and private sectors to promote sustainable environmental solutions while bolstering efforts to manage costs.

<u>Funding Sources by State or Territory</u> (select Florida) lists water and wastewater funding sources in the state. For more information, visit <u>EFCNetwork.org/about-the-network/</u>or <u>https://efcnetwork.org/wp-content/uploads/2020/05/FL-Water-Wastewater-Funds-2020_draft.pdf</u>.

FLORIDA LEGISLATURE

The Florida Legislature may solicit applications directly for Community Budget Issue Request projects, including water projects, in anticipation of upcoming legislative sessions. This process is an opportunity to secure legislative sponsorship of project funding through the state budget. Interested parties should contact their local legislative delegation to determine whether there are opportunities available to fund projects. Information on contacting senators and representatives is available at Leg.State.FL.US.

Florida Rural Water Association

The <u>Florida Rural Water Association</u> (FRWA) is a nonprofit, nonregulatory professional association that assists water and wastewater systems with every phase of operations, including drinking water, wastewater, groundwater protection/source water protection and engineering services.

Active members include public water and wastewater systems such as counties, municipalities, associations, districts, mobile home parks, schools and authorities. For more information, visit <u>FRWA.net</u>.

The <u>FRWA Loan Program</u> assists communities in obtaining competitive interim financing for construction projects. To assist borrowers across the state with financing capital construction projects, FWRA, in conjunction with a partner, created an interim construction loan program to provide construction funding for communities which have received a permanent loan commitment from the U.S. Department of Agriculture-Rural Development (USDA-RD) or permanent loan commitment from DEP's State Revolving Fund (SRF) Program and needs construction funding. The program structure enables communities access to competitive fixed rate loan funds at a very low cost of borrowing. Loan proceeds are utilized for the

construction period only and are paid off with USDA-RD/DEP's SRF funds when the project is complete or funded. For more information, visit: <u>www.frwa.net/funding</u> or contact Gary Williams at 850-668-2746 or <u>Gary.Williams@frwa.net</u>.

Page 5 of 14

U.S. DEPARTMENT OF AGRICULTURE

The <u>U.S. Department of Agriculture (USDA) Natural Resources Conservation Service</u> (NRCS) offers voluntary programs to eligible landowners and agricultural producers to provide financial and technical assistance to help manage natural resources in a sustainable manner. Through these programs, the agency approves contracts to provide financial assistance to help plan and implement conservation practices that address natural resource concerns or opportunities to help save energy, improve soil, water, plant, air, animal and related resources on agricultural lands and non-industrial private forest land. For more information, visit <u>www.NRCS.USDA.gov/wps/portal/</u><u>nrcs/main/national/programs/financial</u>.

- EUSDA's <u>Regional Conservation Partnership Program</u> (RCPP) promotes coordination of NRCS conservation activities with partners that offer value-added contributions to expand the collective ability to address on-farm, watershed, and regional natural resource concerns. Through RCPP, NRCS co-invests with partners to implement projects that demonstrate innovative solutions to conservation challenges and provide measurable improvements and outcomes tied to the resource concerns they seek to address. Read the RCPP Fact Sheet. For more information, visit <u>www.NRCS.USDA.gov/wps/portal/nrcs/main/</u> <u>national/programs/financial/rcpp</u>.
- USDA's <u>Rural Development</u> (USDA-RD) offer loans, grants and loan guarantees to help create jobs and support economic development and essential services such as housing; health care; first responder services and equipment; and water, electric and communications infrastructure. The program promotes economic development by supporting loans to businesses through banks, credit unions and community-managed lending pools, and it offers technical assistance and information to help agricultural producers and cooperatives to improve the effectiveness of their operations. For more information, visit <u>www.RD.USDA.gov</u>.
- USDA's <u>Rural Utilities Service Water and Environmental Programs</u> (WEP) provide funding for the construction of water and waste facilities in rural communities and is proud to be the only federal program exclusively focused on rural water and waste infrastructure needs of rural communities with populations of 10,000 or less. WEP also provides funding to organizations that provide technical assistance and training to rural communities in relation to their water and waste activities. WEP is administered through national office staff in Washington, D.C., and a network of field staff in each state. For more information, visit www. RD.USDA.gov/programs-services/all-programs/water-environmental-programs.
- USDA's <u>Rural Development Rural Utilities Service</u> (RUS) provides much needed infrastructure or infrastructure improvements to rural communities. These include water and waste treatment, electric power and telecommunications services. All of these services help to expand economic opportunities and improve the quality of life for rural residents. For more information, visit <u>www.RD.USDA.gov/about-rd/agencies/rural-utilities-service</u>.

U.S. DEPARTMENT OF COMMERCE ECONOMIC DEVELOPMENT ADMINISTRATION

The <u>U.S. Department of Commerce Economic Development Administration</u> (EDA) provides economic development financial assistance to communities so they can encourage innovation and entrepreneurship in a way that works best for them. Through its network of regionally based

Page 6 of 14

staff and portfolio of <u>flexible granttools</u>, EDA helps communities that are experiencing economic distress take control of their future and position themselves for economic prosperity and resiliency. For funding opportunity information, visit <u>www.EDA.gov/funding-opportunities</u>.

FLORIDA FISH AND WILDLIFE CONSERVATION COMMISSION RESOURCES

Division of Habitat and Species Conservation: Aquatic Habitat Conservation and Restoration Program

The Florida Fish and Wildlife Conservation Commission's Division of Habitat and Species Conservation receives recurring annual allocations of Land Acquisition Trust Fund and Marine Resources Trust Fund to complete aquatic habitat restoration and enhancement projects on public lands throughout the state. Completed projects include ephemeral and forested wetland, lake, river, estuarine, and marine habitat restoration, providing ecological services to people and supporting fish and wildlife resources. These projects restore hydrologic connectivity between habitat types and along landscape corridors; improve water quality; and create productive structural and nursery habitat for fish and wildlife benefiting regional and local communities. FWC works with numerous partner organizations to identify, plan and implement aquatic restoration projects through procurement of engineering, construction, research and monitoring contractors. This program also matches state funding to amplify project impacts by seeking grants from federal programs by the U.S. Fish and Wildlife Service, National Oceanic and Atmospheric Administration (NOAA), National Fish Habitat Partnerships, and National Fish and Wildlife Foundation. For more information visit https://myfwc.com/wildlifehabitats/habitat/ahcr/.

Division of Law Enforcement: Boating and Waterways Section – Derelict Vessel Program

This program offers grants to counties and cities for reimbursement for their costs in the removal of derelict vessels. All derelict vessels (DV), after completing a law enforcement investigation, statutorily required due process procedures, and being entered into the Statewide DV Database, may be submitted for a removal reimbursement grant by a local government. This grant program will reimburse local governments at 100% of their pre-approved costs, until the annual state-wide allocations are exhausted. An executed grant must be in place **before** the vessels are removed and disposed of. Pre-award cost is not allowed for vessels already removed. Please see the following link for a copy of the DV Grant Program guidelines as well as the application form: https://myfwc.com/boating/grants-programs/derelict-vessel/?redirect=dvgrant.

Division of Law Enforcement: Boating and Waterways Section – Marine Debris Program

The FWC does not have an established marine debris grant program but is in the process of establishing one. FWC is currently developing a contract with Miami-Dade DERM to provide funding for abandoned and derelict trap retrieval through fall 2023. FWC is awaiting final approval on a rebudget request submitted to NOAA for FWC to hire dedicated staff to be stationed at Biscayne National Park to assist NPS, Florida Sea Grant and Miami-Dade DERM with continued hurricane debris removal throughout Biscayne Bay on mangrove/spoil islands, reef and reef tract, and the shoreline.

Page 7 of 14

FWC does track and promote additional marine debris removal funding opportunities:

- <u>https://marinedebris.noaa.gov/resources/funding-opportunities</u> Summer/fall funding opportunities released annually, with alternating focus areas.
- <u>https://www.epa.gov/trash-free-waters</u>
- <u>https://myfwc.com/conservation/special-initiatives/cwci/grants/</u> Multiple grant resources that could be used for marine debris and/or other coastal work.
- <u>https://helpingseaturtles.org/apply-for-a-grant/</u>

Division of Law Enforcement: Boating and Waterways Section – Boating Access and Improvement

The Florida Boating Improvement Grant Program (FBIP) offers competitive grants to counties and cities for reimbursement of costs to enhance public boating access, and, contingent upon available funding, will reimburse the local government up to 100% of their pre-approved costs. An executed grant agreement must be in place before the project work begins. No match is required but it increases the score in the competitive selection process. Additionally, eligible projects with at least 25% match that are not selected for FBIP funding may be eligible for federal Sport Fish Restoration funding, if available. This program will pay for a wide variety of facilities and amenities including waterway markers (signs/buoys, channel markers, navigation aids); ramps for motorized boats; piers and docks; surveys; dredging; parking; restrooms; design/engineering/permitting; informational kiosks; and educational items (e.g., brochures, guides and educational programs). Please see the link below for a copy of the FBIP Guidelines as well as the Application form:

https://myfwc.com/boating/grants-programs/fbip/

The Boating Infrastructure Grant Program (BIGP) offers nationally competitive federal grants to public and private applicants for reimbursement of a portion of their costs to enhance public transient recreational vessel boating access. Transient recreational vessels are defined as those 26' in length or greater and staying for 15 days or less. This grant program (contingent upon selection by FWC and award by U.S. Fish and Wildlife Service) will reimburse the applicant up to 75% of their pre-approved costs. A minimum 25% non-federal match is required, and a higher match percentage increases the competitiveness of the application. This program will pay for a wide variety of facilities and amenities including directional waterway markers, slips, docks, breakwaters, parking, restrooms and showers, dredging as part of a project (not maintenance), mooring systems and dockside utilities. Please see the link below for a copy of the BIGP Guidelines as well as the Application form: https://myfwc.com/boating/grants-programs/bigp/.

FLORIDA INLAND NAVIGATION DISTRICT RESOURCES

Waterway Assistance Program

The Waterway Assistance Program is a grant program established by the Florida Legislature and the Florida Inland Navigation District for the purpose of financially cooperating with local governments to increase public access associated with the Atlantic Intracoastal Waterway and associated waterways within the district. The program is authorized by Section 374.976, F.S., and is administered under the

Page 8 of 14

provisions of Chapter 66B-2, Florida Administrative Code. Eligible local governmental agencies include municipalities, counties, port authorities and special taxing districts within the 12 counties of the district.

Grant applications are posted to the district's website in January. Applications are due at the district office toward the end of March. Please see the application package for deadline dates. Funding is awarded in October.

Applications are initially reviewed by district staff for compliance with district rules. If the application is in compliance, applicants present their application to the district's board of commissioners. The board then evaluates the application utilizing a rating form. Projects scoring the minimum number points become eligible for funding which is subject to statutory and budget limitations. For those projects which are approved for funding by the district board, funds become available on October 1.

The limitation on funding has been established by the Legislature to be equal to the tax revenue that the district receives from the county in which the applicant is located. There may be several applicants from within a county competing for these funds.

Waterway related projects must be located on natural, navigable waterways within the district. Eligible waterway related projects include navigation channel dredging; channel markers; navigation signs or buoys; boat ramps; docking facilities; fishing and viewing piers; waterfront boardwalks; inlet management; environmental education; law enforcement equipment; boating safety programs; beach renourishment; dredge material management; environmental mitigation; and shoreline stabilization.

The district is authorized to provide up to 75% for public navigation projects, while all other project categories are eligible for up to 50% funding assistance. The district annually allocates approximately \$10 to \$12 million for the program. Cash and other grant funds may be utilized as the local match.

http://cms5.revize.com/revize/floridainland/grants_and_assistance_programs/index.php

Cooperative Assistance Program

The Cooperative Assistance Program is a grant program established by the Florida Legislature and the district for the purpose of financially cooperating with federal, state and regional governments to alleviate problems associated with the Atlantic Intracoastal Waterway and associated waterways within the district. The program is authorized by Section 374.976, F.S., and is administered under the provisions of Chapter 66B-1, F.A.C.

Eligible federal, state and regional governmental agencies seeking to develop waterway improvement projects within the 12 counties of the district (Miami-Dade to Nassau counties) can apply for funding assistance. Grant application package will be available on the district's website in January And applications are due at toward the end of March. Please see application package for specific deadline dates. Funding is awarded in October.

Applications are initially reviewed by district staff for compliance with district rules. If the application is in compliance, the applicant presents their application to the district's board of commissioners. The board then evaluates the application for funding that is subject to statutory and budget limitations. For those projects which are approved for funding by the district board, assistance funds become available on Oct. 1.

Page 9 of 14

Waterway related projects must be located on natural, navigable waterways within the district. Eligible waterway related projects include the following:

- 1. Public navigation channel dredging.
- 2. Public navigation aids and markers.
- 3. Inlet management projects that are a benefit to public navigation in the district.
- 4. Public shoreline stabilization directly benefiting the district's waterway channels (ICW or OWW).
- 5. Acquisition and development of publicly owned spoil disposal sites and public
- commercial/industrial waterway access
- 6. Waterway signs and buoys for safety, regulation or information.
- 7. Acquisition, dredging, shoreline stabilization and development of public boat ramps and launching facilities.
- 8. Acquisition, dredging, shoreline stabilization and development of public boat docking and mooring facilities.
- 9. Derelict vessel removal.
- 10. Waterway related environmental education programs and facilities.
- 11. Public fishing and viewing piers.
- 12. Public waterfront parks and boardwalks and associated improvements.
- 13. Maritime management planning.
- 14. Waterway boating safety programs and equipment.
- 15. Renourishment on beaches adversely impacted by navigation inlets, navigation structures, navigation dredging or a navigation project.
- 16. Environmental restoration, enhancement or mitigation projects.
- 17. Other waterway related projects.

There is no limitation on the amount of funding that can be requested. The district is authorized to provide up to 75% for certain types of public navigation dredging projects while all other project categories are eligible for up to 50% funding assistance. The district annually allocates approximately \$1 million to \$4 million for the program. Cash and other grant funds may be utilized as the local match.

http://cms5.revize.com/revize/floridainland/grants_and_assistance_programs/index.php

MIAMI-DADE COUNTY RESOURCES

Stormwater Utility Fees

The stormwater utility was established in 1991 to properly manage the environmental impact of stormwater pollution and to provide adequate flood protection.

The utility was created to help solve the problem of polluted stormwater and to improve the drainage capability of areas that are susceptible to flooding. Impervious areas create barriers to rainwater, limiting the ability of water to soak into the ground and recharge the aquifer. Special structures need to be built to drain these areas.

Fees collected by the stormwater utility go toward the planning, construction, operation and maintenance of stormwater management systems – such as canal and drainage improvement projects and secondary drainage systems - in unincorporated portions of the county and within certain municipalities.

They also go toward reducing pollution caused by silt, oil, gasoline, fertilizers, pesticides and litter

Page 10 of 14

carried by the stormwater to the drain age systems and canals that have been developed to prevent flooding during heavy rainfall. Stormwater drains not only have to remove water from the streets as quickly as possible, but they also must deal with all of the contaminants that get picked up along the way. The county utilizes stormwater utility revenue to issue revenue bonds to finance capital improvements to stormwater systems (secondary canals, local drainage infrastructure, etc.).

Water and Sewer Utility Fees

Customer billing by the Miami-Dade Water and Sewer Department (WASD) represents the cost of operating and maintaining existing assets (water and wastewater treatment facilities, pipelines, pump stations, etc.), as well as fund debt service for capital improvements. Capital improvements by the Miami-Dade Water and Sewer Department are funded primarily through revenue bonds issued against water and sewer utility fee revenue. Proceeds from these bonds are generally used to fund projects intended to improve the existing system that will benefit all or a large number of customers, both retail and wholesale.

General Obligation Bonds

General obligation bonds are issued by the county and are payable from ad valorem taxes on all taxable real and tangible personal property within the county (excluding exempt property as required by Florida law). The general obligation bonds are legally backed by the full faith and credit of the county, which has committed taxes over the next 40 years to repay the bonds. The issuance of general obligation bonds requires a voter referendum. Miami-Dade County voters on Nov. 2, 2004, approved the \$2.9 billion Building Better Communities Bond Program, which allowed the county to issue long-term bonds to fund more than 300 neighborhood and regional capital projects. Among these have been water, sewer and stormwater system improvements. Assignment of general obligation bond funds for this purpose must align with a county referendum and requires approval by the board of county commissioners.

Utility Service Fee

The utility service fee is a user fee that is assessed upon water and sewer bills throughout Miami-Dade County to fund regulatory activities necessary to protect drinking water supplies. The fee, which is assessed as 6% of the total bill, supports ground and surface water monitoring, monitoring of landfills and other solid waste facilities, and other regulatory compliance functions necessary for source protection.

Biscayne Bay Environmental Enhancement Trust Fund

An ordinance (180-9) was adopted on Feb. 19, 1980, by the Dade County Commission creating the Biscayne Bay Environmental Enhancement Trust Fund. This fund consists of money from enforcement and damage actions, mitigation assessments, donations, appropriations, grants and allocations.

Funds are used for the express purpose of financing environmental enhancement of Biscayne Bay and its foreshore, with limited environmental enhancement activities in the coastal waters of the county beyond Biscayne Bay such as installation, maintenance or management of artificial reefs and mooring buoys. As per section one of the ordinance, the prioritized list of enhancement activities, excluding studies, described in this overview qualify for funding from this source.

(i) Funds shall be disbursed for the environmental enhancement of Biscayne Bay or its foreshore or coastal waters of the county beyond Biscayne Bay strictly in accordance with terms and

conditions of the grant, allocation, appropriation or donation and shall be earmarked accordingly.

(ii) Any excess monies derived from such grant, allocation, appropriation or donation shall be disbursed or allocated in accordance with the terms and conditions, if any, of such grant, allocation, appropriation or donation. If no such terms or conditions attach to such excess, then such excess, if any, shall be disbursed for the environmental enhancement of Biscayne Bay or its foreshore or coastal waters of the county beyond Biscayne Bay as authorized and approved by resolution of the board of county commissioners.

The Biscayne Bay Environmental Enhancement Trust Fund is kept and maintained in trust by the board of county commissioners for the purposes set forth in this section in a separate and segregated fund of the county that is not commingled with other county funds until disbursed for an authorized purpose.

LEAGUE OF CITIES/MUNICIPALITY RESOURCES

Stormwater Utility Fees

The league is composed of 34 member cities, 31 of which border Biscayne Bay or a canal that drains to the bay. The villages, towns and cities have a variety of financial resources at their disposal, including general fund, stormwater utility fund, transportation plan fund, and homeowner assessments. Additionally, many of members take advantage of the grant programs listing within this document to fund their priority projects affecting the health of Biscayne Bay.

Additional resources they listed that are not included in the document are the Florida Department of Emergency Management, the Florida Department of Transportation and the Florida Beverage Association.

OTHER RESOURCES

Catalog of Federal Domestic Assistance

The <u>Catalog of Federal Domestic Assistance</u> (CFDA) provides a full listing of federal programs that are available to organizations, government agencies (state, local, tribal), U.S. territories and individuals who are authorized to do business with the government. A CFDA program can be a project, service or activity. For more information, visit <u>Recovery.fema.gov/glossary/CFDA</u>.

Congress – State and Tribal Assistance Grant Program

The Congress – State and Tribal Assistance Grant Program provides the opportunity to secure congressional sponsorship of project funding, including water project funding, through the annual federal budget process. The program's stated purpose is to strengthen state, local government and tribal abilities to address environmental and public health threats while furthering environmental compliance. To contact congressional members for assistance in pursuing funding, visit www.GovTrack.us/congress/members.

Division of Emergency Management Recovery Bureau

Florida's <u>Division of Emergency Management Recovery Bureau</u> works to maximize disaster assistance to eligible public entities, individuals and families through various state and federal disaster assistance programs. These programs help to rebuild lives and communities that have been impacted by a major disaster and begin the recovery process. After being requested by the Governor, the U.S. President may sign a disaster declaration that includes both individual and public assistance programs as authorized by the <u>Robert T. Stafford Disaster Relief and Emergency Assistance Act</u>. For more information, visit <u>www.FloridaDisaster.org/dem/recovery</u> or call 850-815-4000.Environmental **Protection Agency**

The Environmental Protection Agency (EPA) awards more than \$4 billion annually in funding for grants and other assistance agreements. From small nonprofit organizations to state governments, EPA works to help many visionary organizations achieve their environmental goals. With countless success stories over the years, EPA grants remain a chief tool to protect human health and the environment. For more information, visit www.EPA.gov/grants.

Page 13 of 14

Florida Resource Directory

The <u>Florida Resource Directory</u> is a one-stop source for learning about the latest state and many federal programs and resources to help local communities. The directory will help rural and distressed urban communities as well as community-based organizations find and access sources of assistance for any type of infrastructure project, housing, health services, training, small business and tourism development assistance, or help building a community park. For more information, visit <u>FMW.state.fl.us:8890/apps/rediHtml/</u> or call 850-717-8980.

Grants.gov

<u>Grants.gov</u> provides a centralized location for grant seekers to find and apply for federal funding opportunities, housing information on over 1,000 grant programs and vetting grant applications for <u>federal grant-making agencies</u>. For more information, visit <u>www.Grants.gov</u>.
